PRASHANT KADAM

Lead Software Engineer

prashantkadam550@gmail.com +91-9964051747 Bengaluru linkedin.com/in/prashant-s-kadam

SUMMARY

I am a full-stack software engineer lead with over 8 years and 4 months of experience designing and delivering scalable enterprise solutions. My expertise includes .NET Core, C#, Angular, React, Typescript, and PostgreSQL, along with cloud technologies such as AWS. I have a strong foundation in microservices architecture and excel at leading teams while mentoring junior developers to deliver high-quality solutions across diverse domains.

SKILLS

- **Backend:** .NET Core, C#, Web APIs and Microservices.
- **Frontend**: Next.js, React, Angular, Typescript and CSS/SCSS.
- **Cloud Technologies**: AWS (Lambda, CDK, S3 Bucket, API Gateway, EventBridge, SQS, Services)
- **Database:** PostgreSQL, NpgSQL, Dapper and MS SQL.
- **AI Tools:** GitHub copilot and Claude code.
- **Methodologies:** System Design, Design Patterns, SOLID Principles,
- **Other:** Azure CI/CD, Code reviews, YAML, azure-pipelines.yml, Postman, swagger and Performance optimization.

PROFESSIONAL EXPERIENCE

Huron Eurasia India Pvt. Ltd, *Lead Software Engineer (Full Stack)* March 2020 – Present | Bengaluru

A company providing innovative solutions for sectors such as healthcare and higher education.

- Led the development of the HRS Grants platform, integrating with Grants.gov.
- Architected scalable microservices deployed on AWS, ensuring high reliability and performance.
- Delivered the Huron Mission Advance (HMA) healthcare application for physician goal tracking.
- Improved backend performance by optimizing API queries and database indexing, reducing response time by 40%.
- Mentored junior developers and conducted code reviews to enhance code quality.

Technologies used: .NET Core (C#), Lambda API, Angular, React, Next.js, PostgreSQL, AWS, Copilot, Moq, XUnit, YAML, azure-pipelines and Microservices.

Nalashaa Solutions Pvt. Ltd, *Software Engineer (Full Stack)* Jan 2019 – Feb 2020 | Bengaluru

A software development company specializing in business solutions

- Developed Maersk Invoice Processor automating billing data extraction from large-scale PDFs
- Successfully migrated legacy billing records to modern databases, enabling seamless integration with new systems.

Technologies used: C# Web API, Angular and MS SQL and Postman.

Quickbill Solutions Pvt. Ltd, *Software Engineer (Full Stack)* Dec 2017 – Dec 2018 | Bengaluru

A technology company focused on financial software solutions

- Built POS Billing System supporting sales promotions, reporting, and Google Drive integration
- Delivered scalable billing solution adopted by multiple businesses nationwide

Technologies used: .NET WinForms, Telerik controls, and MS SQL.

PROJECTS

HRS Grants (Huron), *HRS Grants project for managing fund distributions effectively*

- Managed non-repayable fund distribution system for US nonprofits and institutions
- Designed and implemented modules for grant application proposals, budgets, and document management
- Designed and Implemented SF424 form management
- Developed secure role-based access controls for applicants, reviewers, and administrators.
- Supported production deployments and resolved high-priority defects in live environments.
- Improved system performance and reduced processing time for grant submissions.
- Integrated SQS with backend services for document creation.

- As part of a microservices architecture, I contributed to multiple services beyond the Grants module. Additionally, I developed a custom MUI table component that supports complex calculations, which is also reused across other services.

HMA (Huron), *HMA project aimed at assisting physicians with tracking their goals*
- Healthcare application for physician goal-setting and performance tracking

Maersk Invoice Processor (Nalashaa),
The project focused on extracting historical billing data to enable seamless integration with a new system.
- Developed a data extraction system for Maersk to process legacy data stored in PDF and image formats, transforming unstructured documents into structured database records for integration with modern enterprise systems.
- Utilized iTextSharp to extract text from PDFs and Tesseract OCR for image-based document processing. Implemented Regex-based pattern recognition to parse and extract structured data, which was then stored in a relational database.

POS Billing System (Quickbill), *POS Billing System project enhancing billing operations*
- Contributed to multiple billing modules, including Transactions, Reporting, and Settings.
- I developed a system that uploads sales transaction backups to Google Drive during end- of-day closing. The backup can also be uploaded manually when required.

EDUCATION

Visvesvaraya Technological University, *MCA* 08/2014 – 05/2017 | Belagavi

Bharatesh College of Computer Applications, *BCA* 08/2011 – 05/2014 | Belagavi

KEY ACHIEVEMENTS

Runner-up, Al Agentic Al Hackathon, *Huron* 02/05/2026
Built innovative Al solutions under competitive conditions.

Performance Optimization, *Huron*
Optimized proposal saving process, reducing execution time from 6s to 1s, improving overall system performance.

Created Reusable Custom MUI Data Grid Component, *Huron*
Developed a reusable MUI data grid with support for complex calculations, adopted across multiple services to improve consistency, maintainability, and efficiency in data handling.
